

GIGOOMGAN PASTORAL MOVING FORWARD.

After purchasing a Burenda angus bull a few years ago for use over bos indicus heifers, the Rockemere's from "Gigoomgan" Brooweena have since purchased another angus and most recently a brangus bull J925 from Clermont Bull Sale 2015. This has all come about as they have achieved some great results with not only an improved calving ease in their heifers but also some recent fantastic average prices for grass finished angus cross bullocks. With consignments of these bullocks averaging from \$1600 up to the most recent of close to \$2000/head in today's improved prices.

Calving bos indicus cross heifers to Burenda angus bulls in late October 2015 at Gigoomgan in dry conditions.

Burenda Descreet J925 purchased at Clermont Bull Sale 8th October 2015. Exceptionally quiet, polled, good calving ease with growth and excellent doing ability.
